

Data Up to
2000 - 2021

Adult Mortality, Life Expectancy & Health Expenditure Dashboard

This dashboard provides an analytical overview of "Life Expectancy", "Adult Mortality", and "Current Health Expenditure" across countries and over time. It enables users to compare trends, evaluate changes since 2000, and benchmark selected countries against global averages. The analysis supports data-driven insights into healthcare performance, population health outcomes, and long-term development patterns. Use the navigation buttons below to explore individual indicator pages and interact with filters for deeper analysis.

Adult Mortality Rate

Adult Mortality Rate

The data represents adult mortality rate (per 1,000 population) across countries from 2000 to 2021.
(Higher is Worse)

Life Expectancy at Birth

Life Expectancy at Birth

This dashboard presents life expectancy at birth (in years) across countries from **2000 to 2021**.
(Lower is Worse)

Current Health Expenditure

Current Health Expenditure

Health expenditure reflects national investment in healthcare infrastructure and services.
(Lower is Worse)
